

Artificial Intelligence

Artificial Intelligence (AI) is a technology that allows machines to think and learn like humans.

Machine Learning is a subset of AI that learns from data and improves automatically.

Generative AI can create:

- Text
- Images
- Videos
- Code

Large Language Models (LLMs) are advanced AI models trained on huge amounts of text data.

Gemini is a Generative AI model developed by Google.

Applications of AI:

1. Chatbots
2. Self-driving cars
3. Recommendation systems
4. Healthcare
5. Robotics
